

Polyethylene Yarn

Polyethylene yarn, also known as enleia, is extremely resistant to abrasion and breakage, which makes it last longer than other similar yarns. It presents a great resistance to extreme weather conditions, being therefore recurrently used in agriculture, fishing, commerce and maritime industry.

benefits	Excellent resistance to abrasion and tearing Anti-UV Protection Several Applications
applications	Agriculture Aquaculture Fishing Industry Fishing
technical data	Thickness - 3mm, 4mm, 5mm or 6mm Colour - Green Water or White Presentation - Bobine of 1kg or 5kg
